

REMARKS

Claims 8-23 stand pending in this application. The remarks below are submitted in order to more clearly distinguish the present application from U.S. Patent No. 5,377,745 to Hsieh. Favorable reconsideration of this application, in light of the following discussion, is respectfully requested.

Hsieh discloses a cooling device for a central processing unit. The cooling device includes a fan means 10, a fin means 20, and a fastening means. The fan means 10 includes a fan 13 and a mount plate 15. As the figures of Hsieh clearly illustrate, the fan 13 is an axial flow fan, not a centrifugal fan as in the present application.

If, for any reason, it is felt that this application is not now in condition for allowance, the Examiner is requested to contact Applicants' undersigned attorney at the telephone number indicated below to arrange for an interview to expedite the disposition of this case.

In the event that this paper is not timely filed, Applicants respectfully petition for an appropriate extension of time. The fees for such an extension or any other fees which may be due with respect to this paper, may be charged to Deposit Account No. 50-2394.

Respectfully submitted,

IPS, Inc.
